MEDICARE PART B DRUGS REQUIRING PRIOR AUTHORIZATION

Dear Provider,

Effective March 1, 2026, prior authorization will be required for the Medicare Part B drugs listed in Table 1. **This letter serves as notification of an upcoming change in the prior authorization review process required for administering these medications under the medical benefit.**

Kaiser Foundation Health Plan of Washington (Kaiser Permanente) requires step therapy or prior authorization for a select group of injectable drugs that may be administered under the medical benefit. These reviews are intended to ensure consistent benefit adjudication as well as appropriate utilization in accordance with the Kaiser Permanente Pharmacy & Therapeutics Committee's evidence-based criteria for coverage.

The following injectable drugs will require medically accepted indication review. This is defined as any use of a covered Part B drug that is approved under the Federal Food, Drug, and Cosmetic Act, or any off-label, medically accepted indication that is supported in one or more of the compendia to determine the medically accepted indication.

Table 1. List of Medicare Part B products requiring Prior Authorization effective 3/1/2026
