**ONCOLOGY PRODUCTS UPDATED PRIOR AUTHORIZATION CRITERIA**

Dear Provider,

**Effective March 1, 2025**, the criteria for oncology products in Table 1 and Table 2 will be updated. These products are on the **non-Medicare** list of office-administered drugs requiring prior authorization. **This letter is a notification of the upcoming changes in coverage for these medications under the medical benefit.**

Kaiser Foundation Health Plan of Washington and Kaiser Foundation Health Plan of Washington, Options, Inc. (Kaiser Permanente) require prior authorization for a select group of injectable drugs that may be administered under the medical benefit in a physician’s office or by home infusion. These reviews are intended to ensure consistent benefit adjudication as well as appropriate utilization in accordance with the Kaiser Permanente Pharmacy & Therapeutics Committee’s evidence-based criteria for coverage.

**Table 1. List of oncology products that will have coverage restriction**

<b>BRAND NAME</b>	<b>GENERIC NAME</b>	<b>HCPCS</b>
Rolvedon	Eflapegrastim	J1449
Udenyca Onbody	Pegfilgrastim-cbqv	Q5111

**Table 2. List of oncology products that have updated quantity limits**

<b>BRAND NAME</b>	<b>GENERIC NAME</b>	<b>HCPCS</b>
Libtayo	Cemiplimab	J9119
Enhertu	Fam-trastuzumab deruxtecan	J9358
Kadcyla	Ado-trastuzumab emtansine	J9354
Keytruda	Pembrolizumab	J9271

**Coverage restriction criteria for oncology products (changes are in bold):**

<b>DRUG NAME</b>	<b>COVERAGE CRITERIA</b>
Eflapegrastim (Rolvedon)	<del>Medical necessity review required.</del> <b>Not covered, not medically necessary.</b>
Pegfilgrastim-cbqv (Udenyca Onbody)	<del>Medical necessity review required.</del> <b>Not covered, not medically necessary.</b>

**Quantity limit updates for oncology products (changes are in bold):**

<b>DRUG NAME</b>	<b>COVERAGE CRITERIA</b>
Cemiplimab (Libtayo)	1. Covered for treatment of patients with metastatic cutaneous squamous cell carcinoma (mCSCC) or locally advanced CSCC (laCSCC).

DRUG NAME	COVERAGE CRITERIA
	<p>2. Covered for the treatment of patients with locally advanced cutaneous squamous cell carcinoma.</p> <p>3. Treatment of metastatic NSCLC if ALL of the following apply:</p> <ul style="list-style-type: none"> <li>• Without progression on immunotherapy.</li> <li>• PD-L1 positive</li> <li>• No EGFR/ALK mutations.</li> <li>• As a single agent if PS&gt;2</li> <li>• Patients with ROS-1 gene aberrations must have progressed on approved applicable agents (e.g., ceritinib, alectinib, lorlatinib, entrectinib) and have not previously progressed on with PD-1 immunotherapy agents</li> </ul> <p><b>Quantity Limit: Approved for a maximum of 4.5 mg/kg, up to 350 mg every 21 days for up to 24 months.</b></p>
Fam-trastuzumab deruxtecan (Enhertu)	<p>1. Covered for the treatment of patients with salivary gland cancer if all the following apply:</p> <ul style="list-style-type: none"> <li>• Adenocarcinomas NOS, mucoepidermoid or salivary duct carcinoma</li> <li>• Recurrent metastatic disease</li> <li>• Not a candidate for surgery or radiation</li> <li>• HER2 positive and AR negative</li> </ul> <p>2. Covered for the treatment of metastatic perianal/anal cancer in the second line setting or beyond if HER2 IHC3+</p> <p>3. Covered for the treatment of metastatic pancreatic adenocarcinoma in the third line setting or beyond if HER2 IHC3+</p> <p>4. Covered for recurrent, unresectable or metastatic HER2 positive (IHC3+ or IHC2 and ISH +) breast cancer after disease progression on initial HER 2 directed therapy (i.e., trastuzumab [e.g., Kanjinti], pertuzumab, TDM-1), OR with documented progression/recurrence within 12 months after completion of neo-adjuvant therapy or adjuvant therapy.</p> <p>5. HER2 low recurrent, unresectable or metastatic breast cancer defined as IHC1+ or IHC2+ and ISH Negative: Covered if the following conditions (when applicable) are met:</p> <ul style="list-style-type: none"> <li>• If HR positive: Refractory to CDK 4/6 inhibition: <ul style="list-style-type: none"> <li>○ &lt; 12 months CDK4/6 duration and ESR1 positive, must show progression or intolerance to everolimus with tamoxifen or fulvestrant. (if not previously used) OR</li> <li>○ ≥ 12 months duration on CDK4/6 inhibition and ESR1 positive must show intolerance or progression on elacestrant. AND</li> <li>○ If PIK3CA, AKT1 or PTEN alteration positive: With progression or intolerance with capivasertib or alpelisib AND</li> <li>○ If BRCA1/2 positive treatment till progression with a PARPi (Olaparib)</li> </ul> </li> <li>• If HR negative with PD-L1 positive (CPS ≥ 10): <u>Previous</u> therapy with pembrolizumab plus chemotherapy, until toxicity,</li> </ul>

DRUG NAME	COVERAGE CRITERIA
	<p>progression or duration of 2 years. AND If BRCA 1/2 positive, <u>previous</u> therapy with a PARP inhibitor until intolerable toxicity or progression. AND Previous taxane followed by sacituzumab govitecan-hziy until toxicity or progression. OR</p> <ul style="list-style-type: none"> <li>• If HR negative with PD-L1 negative (CPS &lt; 10) or unknown: <u>Previous</u> therapy with a PARP inhibitor (if BRCA 1/2 mutated) until intolerable toxicity or progression. AND Previous taxane followed by sacituzumab govitecan-hziy until toxicity or progression.</li> </ul> <p>6. Covered for the treatment of HER-2 positive metastatic or advanced GEJ, esophageal, gastric cancer in the second line setting after previous treatment with trastuzumab (e.g., Kanjinti)</p> <p>7. Covered for the treatment of patients with HER2 (ErbB2), NSCLC after initial treatment with chemotherapy +/- immunotherapy as detected by NGS.</p> <p>8. Covered for the treatment of stage IV Colorectal Cancer in the third line setting if all the following apply:</p> <ul style="list-style-type: none"> <li>• HER 2 amplification</li> </ul> <p>9. Covered for the treatment of Stage B/C hepatocellular carcinoma in the third line setting if:</p> <ul style="list-style-type: none"> <li>• HER2 Positive</li> <li>• Child Pugh A</li> </ul> <p><b>Quantity Limit: Fam-trastuzumab deruxtecan-nxki authorizations for all breast cancer indications, will be limited to a maximum dose of 5.4 mg/kg every 21 days for 1 year. Requests for continuation of therapy will require documentation of disease stability (lack of progression)</b></p>
Ado-trastuzumab emtansine (Kadcyla)	<p>1. Covered for use as a single agent in patients with a documented diagnosis of recurrent, unresectable, or metastatic HER2+ breast cancer who:</p> <ul style="list-style-type: none"> <li>• Have received prior therapy for advanced disease including a trial and failure of at least one trastuzumab + taxane-containing chemotherapy regimen.</li> </ul> <p>2. Covered for use as adjuvant therapy in patients with a documented diagnosis of HER2-positive early breast cancer who:</p> <ul style="list-style-type: none"> <li>• Have residual invasive disease in the breast or axilla at surgery after receiving neoadjuvant therapy containing a taxane and trastuzumab (e.g., Kanjinti)</li> </ul> <p>3. Covered for the treatment of patients with Salivary Gland Cancer if all the following apply:</p> <ul style="list-style-type: none"> <li>• Adenocarcinomas NOS, Mucoepidermoid or Salivary Duct Carcinoma</li> <li>• Recurrent Metastatic disease</li> <li>• Not a candidate for surgery or radiation</li> <li>• HER2 positive AND <ul style="list-style-type: none"> <li>○ AR negative as first line.</li> <li>○ AR positive as second line.</li> </ul> </li> </ul>

DRUG NAME	COVERAGE CRITERIA
	<p><b>Quantity Limit: Ado-trastuzumab emtansine authorizations for all breast cancer indications, will be limited to a maximum dose of 3.6 mg/kg every 21 days for 1 year. Requests for continuation of therapy will require documentation of disease stability (lack of progression)</b></p>
<p>Pembrolizumab (Keytruda)</p>	<ol style="list-style-type: none"> <li>1. Treatment of patients with metastatic urothelial carcinoma <ul style="list-style-type: none"> <li>• As first line therapy if combined with enfortumab or</li> <li>• Second line monotherapy after platinum-based therapy</li> </ul> </li> <li>2. Treatment of patients with melanoma: <ul style="list-style-type: none"> <li>• Covered for treatment of patients with unresectable or metastatic melanoma as a single agent <ul style="list-style-type: none"> <li>○ Covered in combination with CTLA-4</li> <li>○ Not covered as monotherapy following progression on checkpoint inhibitor.</li> </ul> </li> <li>• Covered for adjuvant treatment of resected stage IIB, IIC melanoma.</li> <li>• Covered for neoadjuvant treatment of Stage IIIB-IV</li> </ul> </li> <li>3. Treatment of patients with stage II-III non-small cell lung cancer (NSCLC), ALL of the following must apply: <ul style="list-style-type: none"> <li>• Candidate for neoadjuvant therapy.</li> <li>• If EGFR/ALK negative.</li> <li>• Combined with platinum-based chemotherapy</li> </ul> </li> <li>4. Treatment of stage IV Thymic Carcinoma as subsequent therapy after chemotherapy.</li> <li>5. Treatment of metastatic pancreatic adenocarcinoma: <ul style="list-style-type: none"> <li>• Covered as second line therapy if MSI-H or dMMR tumor status.</li> <li>• Covered as third line therapy if TMB is at least 10.</li> </ul> </li> <li>6. Treatment of hepatocellular carcinoma if ALL the following apply: <ul style="list-style-type: none"> <li>• Second line treatment option</li> <li>• Child Pugh A</li> <li>• Immunotherapy Naïve</li> </ul> </li> <li>7. Treatment of neoadjuvant triple negative breast cancer in patients with high-risk disease (High Tumor Burden or <math>\geq T1c</math> and LN + or <math>\geq T2</math>) when combined with paclitaxel, carboplatin or doxorubicin and cytoxan.</li> <li>8. Adjuvant treatment of TNBC after neoadjuvant pembrolizumab treatment.</li> <li>9. First line therapy for metastatic, unresectable, or recurrent PDL1 (CPS <math>\geq 10</math>) positive, triple negative breast cancer, or after 1<sup>st</sup> line therapy if no prior immunotherapy in the following conditions: <ul style="list-style-type: none"> <li>• ER/PR negative and HER2 Low in the first line setting OR</li> <li>• In combination with carboplatin and gemcitabine OR</li> <li>• In combination with paclitaxel</li> </ul> </li> <li>10. Treatment of Endometrial Cancer if:</li> </ol>

DRUG NAME	COVERAGE CRITERIA
	<ul style="list-style-type: none"> <li>• First Line (systemic treatment naïve) <ul style="list-style-type: none"> <li>○ dMMR/MSI-H &amp; Stage III disease.</li> <li>○ Stage IV</li> </ul> </li> <li>• Recurrent Endometrial Cancer <ul style="list-style-type: none"> <li>○ Platinum free interval &gt; 6months or No prior systemic treatment.</li> <li>○ Platinum free interval ≤ 6months, dMMR/MSI-H, or pMMR/MSS if combined with Lenvatinib.</li> </ul> </li> </ul> <p>11. Treatment of locally advanced, recurrent or metastatic cervical cancer when ALL of the following apply:</p> <ul style="list-style-type: none"> <li>• Not a surgical candidate</li> <li>• PDL1 Positive (CPS ≥ 1)</li> <li>• Immunotherapy naïve</li> </ul> <p>12. For patients with locoregionally advanced colorectal cancer as neoadjuvant treatment if:</p> <ul style="list-style-type: none"> <li>• Microsatellite instability-high (MSIH) or mismatch repair deficient (dMMR)</li> <li>• Patients who are immunotherapy naïve</li> </ul> <p>13. Locally advanced or metastatic Basal Cell carcinoma</p> <ul style="list-style-type: none"> <li>• If not amenable to RT or surgery as first line therapy.</li> <li>• If used as second line therapy.</li> </ul> <p>14. Treatment of metastatic or advanced GEJ, esophageal, gastric cancer:</p> <ul style="list-style-type: none"> <li>• In the first line setting: <ul style="list-style-type: none"> <li>○ as monotherapy</li> <li>○ OR in combination with platinum-based chemotherapy</li> <li>○ OR in combination with trastuzumab for Her2 over expression and with CPS greater or equal to 1.</li> </ul> </li> <li>• In the second line setting: <ul style="list-style-type: none"> <li>○ if immunotherapy naïve</li> <li>○ PD-L1 greater or equal to 1 or dMMR/MSI-H</li> </ul> </li> <li>• In the 3rd line setting and beyond if TMB high (greater or equal to 10 mut/MB)</li> </ul> <p>15. Treatment of metastatic esophageal squamous cell carcinoma:  In the first line setting if combined with platinum-based chemotherapy  As monotherapy if ALL of the following are met:</p> <ul style="list-style-type: none"> <li>○ Immunotherapy naïve</li> <li>○ Progression following platinum-based chemotherapy</li> </ul> <p>16. Treatment of metastatic, recurrent, or unresectable squamous-cell carcinoma of the head and neck.</p> <ul style="list-style-type: none"> <li>• As first line treatment</li> <li>• As second line or subsequent treatment of solid tumors.</li> <li>• In patients who are MSI-H or TMB-H</li> </ul>

DRUG NAME	COVERAGE CRITERIA
	<ul style="list-style-type: none"> <li>• Not covered for failure or progression on or after an alternative PD-L1 agent.</li> </ul> <p>17. Treatment of Unresectable or Metastatic Biliary Tract Cancer:</p> <ul style="list-style-type: none"> <li>• In the first line setting if combined with Cisplatin and gemcitabine.</li> <li>• In the second line setting, as monotherapy if MSI-H /dMMR AND if patient is pembrolizumab naïve.</li> <li>• In the third line setting if TMB- High (greater or equal to 10mut/MB) AND patient is pembrolizumab naïve.</li> </ul> <p>18. Treatment of metastatic Merkel cell carcinoma.</p> <p>19. Relapsed/Refractory classical Hodgkin Lymphoma (cHL) after at least one prior line of therapy and no prior I/O therapy.</p> <p>20. Treatment of patients with metastatic or unresectable squamous-cell carcinoma of the head and neck (SCCHN):</p> <ul style="list-style-type: none"> <li>• Covered as first line a single agent if CPS <math>\geq</math>1. <ul style="list-style-type: none"> <li>○ in combination with platinum chemotherapy for first line treatment (regardless of CPS).</li> </ul> </li> <li>• Not covered for failure or progression on or after an alternative PD-L1 agent</li> </ul> <p>21. Treatment of mesothelioma after first line therapy for patients who are immunotherapy naïve</p> <p>22. Treatment of stage IV Colorectal Cancer that is</p> <ul style="list-style-type: none"> <li>• Microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) OR</li> <li>• Non-oligometastatic for second-line or greater therapy with tumor mutational burden (TMB) <math>\geq</math>10</li> <li>• Note: If progression noted off immuno-oncology (IO) therapy after completion of 2 years of therapy, may restart utilizing first line IO therapy options.</li> </ul> <p>23. Treatment of renal cell carcinoma (RCC):</p> <ul style="list-style-type: none"> <li>• In combination with axitinib or Lenvatinib for patients with metastatic renal clear cell carcinoma (RCC) who are not surgical candidates OR</li> <li>• As adjuvant therapy if intermediate or high-risk disease, when given as monotherapy for up to one year</li> </ul> <p>24. Covered for the treatment of metastatic castration resistant prostate cancer if:</p> <ul style="list-style-type: none"> <li>• MSI-H, dMMR</li> <li>• TMB at least 10 mut/Mb</li> </ul> <p>25. Covered for the treatment of patients with metastatic perianal/anal cancer:</p> <ul style="list-style-type: none"> <li>• Following platinum-based therapy if no prior immunotherapy used AND: <ul style="list-style-type: none"> <li>○ No molecular findings to guide treatment OR</li> </ul> </li> </ul>

DRUG NAME	COVERAGE CRITERIA
	<ul style="list-style-type: none"> <li>○ MSI-H/dMMR or TMB-H (greater or equal to 10 mut/MB)</li> </ul> <p>26. Covered for the treatment of patients with Salivary Gland Cancer if all the following apply:</p> <ul style="list-style-type: none"> <li>• Adenocarcinomas NOS, Mucoepidermoid or Salivary Duct Carcinoma</li> <li>• Recurrent Metastatic disease</li> <li>• Not a candidate for surgery or radiation</li> <li>• TMB greater or equal to 10 Mutations/Mb</li> </ul> <p>27. Covered for patients with Anaplastic Thyroid Carcinoma (ATC) if no actionable mutation present or as subsequent line of therapy AND in combination with Lenvatinib.</p> <ul style="list-style-type: none"> <li>• Patient must be intolerant or contraindicated to chemotherapy.</li> </ul> <p>Quantity Limit: Pembrolizumab authorizations for all indications, will be limited to 1 year. Requests for an additional year of therapy will require documentation of disease stability (lack of progression).</p> <p><b>Quantity Limit (applies to all indications): Max dose 200 mg every 3 weeks or 400 mg every 6 weeks.</b></p>

### Additional Information

A complete list of office-administered injectable drugs requiring prior authorization can be found on the Kaiser Permanente provider website at <https://wa-provider.kaiserpermanente.org/provider-manual/clinical-review/officeinject>.

To request prior authorization review, please use the Referral Request online form (login required) located on the Kaiser Permanente provider website at <https://wa-provider.kaiserpermanente.org/provider-manual/clinical-review/preservice>.

You can also fax your request to the Review Services department toll-free at 1-888-282-2685.

Thank you for the care you provide to our members, your patients. If you have any questions about this process, please call Review Services at 1-800-289-1363, Monday through Friday from 8 a.m. to 5 p.m.

Sincerely,

Ravi Ubriani, MD, Chair  
Pharmacy & Therapeutics Committee
