

## INTERVENTIONAL GI

Our interventional GI program consists of a team of highly skilled gastroenterologists who have received additional fellowship training in well-known programs across the country. Our goal is to provide the highest level of endoscopic expertise to diagnose and treat a variety of digestive disorders using minimally invasive techniques.

### Our experienced team treats:

- Endoscopic ultrasound (EUS)
- Endoscopic Retrograde Cholangiopancreatography (ERCP)
- Pancreatic pseudocyst drainage
- Barrett's esophagus ablation
- Complex polyp removal
- Endoscopic suturing
- Deep enteroscopy
- Feeding tube placement

### What our patients say about us

“Dr. Chen is wonderful – very professional, kind, asks good questions and listens well, communicates at your level of understanding, and makes sure there will be follow-up.”

“[Dr. Sooklal] was the best I have seen (except for my primary) in the last 3 yrs. She was compassionate, spoke clearly and explained facts and possible diagnosis.”

“[Dr. Hwang] was a very caring and compassionate doctor, talked about the cancer and what our options were, helped with options for pain care and what is next. Great person!”

“Dr. Klair is so supportive and thorough. His treatment plan has given me back a quality of life I haven't experienced in decades. I can't offer enough superlatives about this doctor. He's a keeper.”

“Dr. Yeh was attentive, informative, and polite and addressed all of my concerns either with explanations and advice, or with follow up plans.”

### Our team

Shelini Sooklal, MD

Daniel Hwang, MD

Jagpal Klair, MD

Ronald Yeh, MD
