

## INFLAMMATORY BOWEL DISEASE

At the Kaiser Permanente Washington Inflammatory Bowel Disease Center, our team of highly trained providers offers comprehensive care. Our IBD specialists have extensive expertise in the treatment of inflammatory bowel disease, including Crohn's disease and ulcerative colitis. We offer highly personalized treatment to develop the best medical management plan and outcomes for our patients.

Our gastroenterologists have advanced training in the medical management of inflammatory bowel disease as well as chromoendoscopy, enteroscopy, and stricture dilation. Our cohesive IBD team includes gastroenterologists, nurse practitioners, IBD nurse coordinators, IBD pharmacists, surgeons, dermatologists, rheumatologists, and nutritionists. Together we address all aspects of IBD care, from nutrition to medications and cancer screening, so that we can provide holistic and individualized care for our patients.

### Our experienced team treats a number of complex situations

- Personalized care by our expert IBD gastroenterologists
- Nursing support and education by our IBD nurse coordinator
- IBD-focused pharmacy support
- Nutrition management
- Multidisciplinary evaluation by our colleagues in rheumatology, dermatology and colorectal surgery
- Imaging services, including ultrasound, CT, and MRI
- Endoscopy procedures, including upper endoscopy, enteroscopy, colonoscopy, chromoendoscopy, and capsule endoscopy
