

## Structural Heart Program of Excellence

The Kaiser Permanente Structural Heart Program of Excellence provides care for an array of cardiac diseases with cutting edge, minimally invasive techniques. Our Heart Team consists of cardiologists, surgeons, and advanced practice providers who provide personalized care with a focus on quality and safety. The program has over 10 years of experience and is among the top 25% of programs in the nation when it comes to quality and safety metrics. We aim to provide world class care for structural heart disease with our innovative and highly specialized team.

### Our experienced team treats:

- Transcatheter aortic valve replacement (TAVR)
- Transcatheter edge-to-edge mitral valve repair
- Closure of patent foramen ovale (PFO) and atrial septal defects (ASD)
- Transcatheter mitral balloon valvuloplasty
- Surgical aortic valve replacement
- Surgical Mitral valve repair

### What our patients say about us

*"You have added many more miles to this body. You, your staff, and Overlake Hospital have given me excellent care"*

*"Thoughtful and wonderful work... made me feel secure and assured you had me as your #1 priority."*

*"The hospital room was a TAVR patient room. It was spacious and clean. The staff was attentive and very nice. The food was really GREAT - best ever I have ever had in a hospital. The doctors were exceptional. I was treated with kindness and respect."*

*"Absolutely the best people! Nurses, aide, surgeons, anesthesiologist. All were great!"*
