Patient presents with acute respiratory illness

Greeter or PAR advises mask and hand sanitization

Patient placed in Separate “Contact/Droplet” precaution waiting space

Triage screening for COVID-19 risk factor per PUI categories
- Fever ≥ 100°F
- Cough
- Shortness of Breath
- Congestion or Runny Nose
- Malaise/Fatigue
- Muscle Pain
- Headache
- Diarrhea
- Sore Throat
- Loss of sense of smell or taste
- Chills
- Repeated shaking with chills
- Wear droplet precautions

If able, dedicate a separate triage RN/room
Consider provider in triage or teletriage

Mild illness:
1) Move to separate room designated waiting room
2) Droplet precautions; use airborne precautions for aerosolizing procedures including intubation, nebulizer
3) Do a Medical Screen Examination and consider d/c home

Moderate illness:
1) Droplet precautions
2) MSE and consider d/c home based on severity

Severe illness:
1) Move to separate room
2) Continue droplet precautions; use airborne precautions for aerosolizing procedures including intubation, nebulizers

COVID-19 Testing
