About the Course
This course is designed to address the wide range of dermatology conditions commonly seen in primary care. Attendees will receive clinical updates and useful management strategies for commonly seen conditions. Course content will be clinically oriented, informal, and interactive, with illustrative case presentations and opportunities for questions and comments.

Target Audience
Primary Care physicians, advanced practice nurses, physician assistants, and members of the health care team who seek to advance their knowledge in this area.

Course Objectives
At the end of the conference, attendees will be able to:
- Diagnose commonly seen conditions of hair loss, review diagnostic workup and treatment options.
- Identify different types of acne and choose the best treatment.
- Separate common myths from facts about diagnosis and treatment of psoriasis.
- Recognize and differentiate common rashes and determine when referral is indicated.
- Recommend effective topical skin care treatments.
- Review seborrheic keratosis in the elderly.
- Integrate skin cancer management skills into clinical practice.
