About the course
This FREE live online CME will focus on HEDIS® 2020. In this course, participants will receive an overview of HEDIS®, learn about how HEDIS data is used by external entities to improve healthcare, review the highlights and changes to HEDIS® clinical measures for 2020, and discuss best practices for measuring and improving quality through use of these measures.

Objectives
At the end of this educational activity, attendees will be able to:

- Describe HEDIS® and how it impacts quality
- Summarize new, retired, and/or changes to existing HEDIS measures for 2020
- Outline how HEDIS rates are used to rank providers & health plans
- Discuss approaches to improve your organization’s performance on HEDIS measures

Target Audience
Primary care physicians, health care leadership, nursing, pharmacy, and consultative specialty physicians who may be coding for HEDIS measures.

Registration
Register each individual attendee at https://tinyurl.com/spl3mjw
A unique course link is emailed after registration. Space is limited to first 100 participants.
